Security Reference File

V.3.4

Helping the global financial community make informed decisions through the provision of fast, accurate, timely and affordable reference data services

With more than 20 years of experience, we offer comprehensive and complete securities reference data for equities and fixed income instruments around the globe.

Our customers can rely on our successful track record to efficiently deliver high quality data sets including:

- Worldwide Corporate Actions
- Worldwide Fixed Income
- Security Reference File
- Worldwide End-of-Day Prices

Exchange Data International has recently expanded its data coverage to include economic data. Currently it has three products:

- African Economic Data www.africadata.com
- Economic Indicator Service (EIS)
- Global Economic Data

Our professional sales, support and data/research teams deliver the lowest cost of ownership whilst at the same time being the most responsive to client requests.

As a result of our on-going commitment to providing cost effective and innovative data solutions, whilst at the same time ensuring the highest standards, we have been awarded the internationally recognized symbol of quality ISO 9001.

Headquartered in United Kingdom, we have staff in Canada, India, Morocco, South Africa and United States.

Different Types of Security Reference File Feeds

All these security reference files include the same security reference announcements and the only difference is the inclusion of certain identifiers.

ISINs Format

680 file – security reference announcements with ISINs and no Sedols

683 file – corresponding security master file with ISINs and no Sedols

760 file – corresponding security master file with ISINs and no Sedols. Fields added: GICS, LEI, NAICS, CIN, ShellComp, CIC, FISN

Sedol Format

690 file – security reference announcements with Sedols included along with ISINs – license with LSE is required for Sedols

693 file - corresponding security master file with Sedols included along with ISINs – license with the LSE is required for Sedols

761 file – corresponding security master file with Sedols included along with ISINs – license with the LSE is required for Sedols. Fields added: GICS, LEI, NAICS, CIN, ShellComp, CIC, FISN

FIGIs Format

695 file – corporate actions file with FIGIs codes and no Sedols included

698 file - corresponding security master file FIGIs codes and no Sedols included

Bloomberg Format

762 file – corporate actions file with FIGIs codes and no Sedols included. Fields added: GICS, LEI, NAICS, CIN, ShellComp, CIC, FISN

Detailed Note File

689 file – Detail notes files associated with all the corporate actions announcements files

685 file format – Customize file format with security master file with Sedols and FIGIs codes included along with shares listed and outstanding. License with the LSE required for Sedols

PIT (Point in Time)

PIT_SRF - contains the start and end dated time series changes chain at the listing level.

PIT_EVT - contains the WCA static data events on which PIT SRF was built.

These static events also indicate the reason why there was a static data change. Every PIT_SRF record with a past end date will have a minimum of one PIT_EVT records, occasionally having even more than one.

Securities Reference File

Identify securities together with their associated standing data

Get up to date information on equities, warrants, fixed income instruments and many other types of securities traded on global exchanges. EDI's securities reference file gives you access to detailed information on over 1,300,000 securities including:

- Equities
- Debt instruments
- Warrants
- Certificates
- Mutual funds
- Exchange traded funds
- Indices

Combine securities reference data with GICS®

Classify securities by industry sector and use the universal, reliable and comprehensive information you are provided with to capture and assess the impact of global, regional and local industry portfolio trends.

Make use of the extensive fields provided

Gain valuable insights. Exchange Data International's Securities Reference File covers over 40 fields. Of these include:

- SEDOL™
- ISIN
- Issuer name
- Country of register
- CFI code
- Security class
- Industry classification

Undertake quick and accurate reference checks

Use EDI's securities reference file to identify name changes and additions and deletions that occur in any stock comprised in the extensive database.

Securities Reference Data Coverage

Take advantage of daily updates of securities reference data

Have securities reference data supplied daily and with history via an FTP connection. Alternatively, data can be delivered as a one-off ad-hoc feed.

Be confident in the knowledge that EDI can, upon request, provide its clients with a tailored feed for any field and in any order. Securities reference data feeds are comprised of:

Customisation

EDI is proud to offer the most effective and efficient solutions tailored to meet each individual customer's needs.

We offer a range of customisation options including:

- Delivery-based solutions to complement existing client infrastructure.
- Content provided at the geographical or portfolio holding level.
- Feeds containing particular formats, field content and integrated client level data items.

EDI uses its extensive data research expertise to source, scrub and integrate new client specified data items with existing products and services. For instance, a request from a multinational investment bank to source the DR universe and map it against its underlying share portfolio ultimately led to the development of EDI's successful Depository Receipt Database.

In addition, EDI was the first vendor to successfully launch an ISO 15022 Corporate Action Messaging feed. This enables customers to reduce costs and increase efficiency by removing the need for multiple feed handlers.

Support

Customer Support

Monday – Friday

Open 24 hours

Saturday

12AM - 8AM (GMT)

Sunday

11PM-12AM(GMT)

Call +44 207 324 0020

Email: support@exchange-data.com

Customer support is closed Christmas and New Year's Day.

We aim to acknowledge all queries within an hour of receipt and answer queries within 24 hours where possible.

We will send a progress report if a query is not resolved within that time-frame. We resolve around 95% of customer queries within 24 hours.

All queries sent to our Support department are filtered and dispatched to the relevant department. An IT staff member is engaged in the communication process to resolve complicated technical issues.
