By choosing Exchange Data International (EDI), you benefit from a partner committed to delivering high-quality, customized data solutions with efficiency and integrity.

Proven Data Quality & Expertise

In-house Expertise:

Our dedicated IT and data analysis teams ensure that the data we provide is meticulously processed and validated, enabling clients worldwide to make informed decisions based on reliable information

Intellectual Property Ownership

Full Transparency:

We provide our clients with complete ownership of the web scraping code, scripts, and methodologies used.

No Vendor Lock-In:

Unlike many providers who retain control over developed scrapers, we empower clients with full access to the delivered solutions.

Scalable & Reusable Solutions:

Our scrapers are built using modular architectures, making them easy to scale and adapt for new data needs.

Customized Service Agreements

Tailored Solutions:

Understanding that each client has unique requirements, we offer bespoke data services. Our approach ensures you receive precisely what you need.

Flexible Engagement Models:

Whether you need ongoing scraping services, one-time data extractions, or custom automation, we provide adaptable service plans.

Rapid Turnaround Times

Efficient Delivery:

Adhering to agreed Service Level Agreements (SLAs), we consistently provide quick turnaround times, ensuring that your data needs are met promptly and effectively.

Automated Scheduling:

We optimize scraping frequency to ensure fresh data is available as per your requirements.

Dedicated Development Team

Experienced Python Developers

Our developers specialize in Python web scraping, utilizing robust libraries such as **Scrapy**, **BeautifulSoup**, **Selenium**, and **Playwright**.

Continuous Improvement:

Our team constantly refines scraping techniques to maintain performance and efficiency.

Focused Expertise:

Our team offering dedicated support and ensuring that your projects are handled with the utmost professionalism and technical proficiency.

Handling High Volumes:

We manage increasing data demands without compromising performance.

Scalable Infrastructure:

We optimize scripts for multi-threading and parallel processing to speed up data collection.

Advanced Monitoring & Support

Automated Logging & Alerts:

Our monitoring tools log every scraping operation and send alerts for failures or anomalies.

Multi-Tiered Support:

We provide structured escalation processes with dedicated response times for different issue levels.

Trusted by Global Enterprises

Worldwide Data Services:

We serve global clients in financial markets, exchanges, and investment firms.

Client-Centric Approach:

We maintain long-term partnerships by focusing on customer satisfaction and reliability.
