

Get Complimentary Financial Data to Jump-Start Your Business with EDI Ventures

We still remember what it's like to start a business, with a very big idea and a very limited budget.

Exchange Data International, a premier provider of financial reference data, can assist you in getting your Fintech or Data business to the next level.

EDI Ventures has successfully enrolled early stage entrepreneurial Fintech companies in the programme. Our partners are already seeing the rewards and productively signing up subscribers to their services.

How can we help?

We'll provide you with the data you need-at no cost in order to reach the critical 'proof of concept' step, where you can demonstrate your product to potential users, partners and suppliers.

What's in it for us?

We ask for two things:

1. A revenue share in the sales which utilise our data and which also gives you the right to continue your nil-cost data supply.

Overview

Exchange Data International **EDI**, helps the global financial and investment community better manage and reduce risk through the provision of fast, accurate, timely and affordable data reference services. We understand how crucial financial data is and take a different approach to how we provide it: We do not rent data, we sell it. Which means, after our contract is finished you keep all data received to date. We do not have onerous redistribution rules. We tailor our service to meet your needs.
