EMED

10 Reasons

Why You Should Go With Our Economic Database

Regions/Groups

Data is organized into different Regions/Groups for easy access. Alternative layouts are available to view data for some databases (by country or by topic).

Select what you want

The customer can choose which countries and/or indicators - data is customized to the client's needs and therefore the client only pays for what they selected.

Primary/Official Sources

Proprietary databases are built upon primary official sources: central banks, statistical offices, finance ministries, stock exchanges, industry associations, and other government and semi-government bodies

Updates

Updates are done at least two times a day. The system identifies the updated parts on the databases.

Worksheets/User Documents

The interface (dXtime software) allows you to build your own User Documents (Worksheets) which can be shared as an internal database in your company. It allows a "quick display of percentage changes (%), differences, etc, based on the current selected series.

Data Manipulation

The interface consists of built-in tools for data manipulation that will instantly facilitate the process of doing advanced calculations. For example, the data window features buttons allow the quick display of percentage changes (%), differences, etc., based on the selected series.

Forecasting

The built-in versions of the TRAMO-SEATS programs include features such as forecasting the original series (if you have enough data points).

File Formating

This interface allows times series data to be written to a wide range of file formats, including spreadsheets, images, econometrics, statistical and interchange formats.

Excel add-in

An Excel add-in is included in the package to export and link series to your worksheets for automatic updating of your data.

Delivery

In addition to the dedicated interface software, clients may also choose to receive a database feed in the form of easy-to-process CSV files.

Dedicated account manager to cater for client's data needs. No generic help centre.
