differently

Helping the global financial community make informed decisions through the provision of fast, accurate, timely and affordable reference data services

With more than 20 years of experience, we offer comprehensive and complete securities reference and pricing data for equities, fixed income and derivative instruments around the globe.

Our customers can rely on our successful track record to efficiently deliver high quality data sets including:

- Worldwide Corporate Actions
- Worldwide Fixed Income
- Security Reference File
- Worldwide End-of-Day Prices

Exchange Data International has recently expanded its data coverage to include economic data. Currently it has three products:

- African Economic Data www.africadata.com
- Economic Indicator Service (EIS)
- Global Economic Data

Our professional sales, support and data/research teams deliver the lowest cost of ownership whilst at the same time being the most responsive to client requests.

As a result of our on-going commitment to providing cost effective and innovative data solutions, whilst at the same time ensuring the highest standards, we have been awarded the internationally recognized symbol of quality ISO 9001.

Headquartered in United Kingdom, we have staff in Australia, Canada, China, Hong Kong, India, Malaysia, Morocco, South Africa and United States.

Short Interest Data

Exchange Data International provides **short interest data** for a number of global markets. Short interest is a market- sentiment indicator that tells whether investors think a stock's price is likely to fall. It can also be compared over time to examine changes in investor sentiment.

Short interest regulation and reporting requirements vary by country. The tables below outline the data collected in each market where short selling is permitted.

We are in the process of adding two additional fields namely Short Ratio which gives the days to cover and Average Traded Volume for the past 30 days.

Countries with Short Interest Data by Position Holder – Data fields provided

Data for these countries is reported to local regulators in compliance with ESMA short selling regulations and began for most of these markets on 1 November 2012. The exceptions to this are Spain, which has data going back to 10 June 2010 and Greece where the history begins 30 May 2013.

- Start date
- End date
- Description of restriction
- Link to regulatory notice

There is also a section on EU restrictions:

For EU countries, additional restrictions may apply, and EDI will include a list of those shares as published on the ESMA registers. This is a daily file and includes the following:

- FIGI Global ID
- FIGI Exchange Ticker
- Local code
- ISIN
- US Code
- SEC ID
- Start data
- Description of restriction/Regulating Authorization

Short Selling Time Reporting Rules

Country Country Code

Australia AU

Australia requires reporting short positions exceeding \$100,000 and 0.01% of the share class.

Report by 9 am next day capturing all short sales executed up to 7 pm.

The total of short positions for financial products on a given reporting day will be **published on the ASIC website four days after the reporting day (T+4)**. These reports will not contain short seller details.

Country Country Code

Austria AT

Article 9(2) of the Short Selling Regulation establishes that “The relevant time for calculation of a net short position shall be at midnight at the end of the trading day on which the natural or legal person holds the relevant position. That time shall apply to all transactions irrespective of the means of trading used, including transactions executed through manual or automated trading, and irrespective of whether the transactions have taken place during normal trading hours. The notification or disclosure shall be made not later than at 15.30 on the following trading day. The times specified in this paragraph shall be calculated according to the time in the Member State of the relevant competent authority to whom the relevant position must be notified”.

Article 9(4) of the Short-Selling Regulation determines that “The public disclosure of information set out in Article 6 shall be made in a manner ensuring fast access to information on a non-discriminatory basis. That information shall be posted on a central website operated or supervised by the relevant competent authority. The competent authorities shall communicate the address of that website to ESMA, which, in turn, shall put a link to all such central websites on its own website”.

As explained in ESMA’s Consultation Paper there are certain aspects of the SSR which provide a flexible approach. The deadline is 15:30 for publications of net short positions, this applies to both the notification and the disclosure. Competent authorities can receive notifications at this time, and they should then publish the notification immediately.

Competent authorities can receive notifications at this time, and they should then publish immediately.

Country Country Code

Brazil BR

Q1) When do short sales need to be notified to the regulator?

In Brazil, we have a beneficial owner regime, meaning that every trade is cleared and settled with the investor identification. Besides, sellers shall have their stocks in a central securities depository (CSD) at the settlement time, implying that they have to own the stocks or borrow them. There is no naked short selling in Brazil. According to CVM Instruction 441/2006 (art. 2), only a financial market infrastructure licensed by CVM as a CSD can provide stock lending services and this institution shall inform daily the CVM about the operations done in its market.

Q2) When does the regulator publish the data?

The CVM does not publicize data regarding short selling. However, the CVM Instruction 441/2006 (art. 11) establishes that CSDs which provide stock lending services shall disclose, daily and for each security, the volume lent.

Considering that stock lending is to some extent a future settlement contract, provisions of the CVM Instruction 283/1998 also apply. Such Instruction determines that exchanges shall set exposure limits for each investor, intermediary and market. For transparency purposes, B3, the trading venue licensed in Brazil, also discloses in its web page the number of contracts traded per day.

Please be aware that Article 9(2) of the Short Selling Regulation establishes that “The relevant time for calculation of a net short position shall be at midnight at the end of the trading day on which the natural or legal person holds the relevant position. That time shall apply to all transactions irrespective of the means of trading used, including transactions executed through manual or automated trading, and irrespective of whether the transactions have taken place during normal trading hours. The notification or disclosure shall be made not later than at 15.30 on the following trading day. The times specified in this paragraph shall be calculated according to the time in the Member State of the relevant competent authority to whom the relevant position must be notified”.

Article 9(4) of the Short-Selling Regulation determines that “The public disclosure of information set out in Article 6 shall be made in a manner ensuring fast access to information on a non-discriminatory basis. That information shall be posted on a central website operated or supervised by the relevant competent authority. The competent authorities shall communicate the address of that website to ESMA, which, in turn, shall put a link to all such central websites on its own website”.

As explained in ESMA’s Consultation Paper there are certain aspects of the SSR which provide a flexible approach. The deadline is 15:30 for publications of net short positions, this applies to both the notification and the disclosure. Competent authorities can receive notifications at this time, and they should then publish immediately.

Outstanding short position by issue showed above is calculated by collecting outstanding short position by issue reported by the investor with a reporting obligation in compliance with the Article 180-2 of the Financial Investment Services and Capital Markets Act.

In accordance with the outstanding short position reporting system, an investor is obligated to report when the investor's outstanding short position meets the criteria below.

-When the ratio of the investor's net outstanding short position is at or below negative (-) 0.01% and the value of the net outstanding short position is at or below negative (-) KRW 100 million - When, regardless of the ratio, the value of the net outstanding short position is at or below (-) KRW 1 billion.

Since the investor is required to report outstanding short position until two days from T (when the reporting obligation arises), outstanding short position of two days before the day is provided.

(Please note that outstanding short position can be changed when the investor makes a new or modified report on the position after 18:00 on T+2 to the Financial Supervisory Service.)

Firstly, firms are obligated to report short positions to FINRA twice a month. The short positions reflect a firm’s accumulated short position in a security in effect at the end of the day on the settlement date, 15th of the month (or prior settlement date if the 15th falls on a weekend or holiday) and on the last settlement date of the month.

Secondly, when a broker-dealer executes a sale, it has an obligation to report the transaction within 10 seconds of execution and to indicate if the sale was long or short. The total number of shares sold short are compiled and published on a daily and monthly basis by the Exchanges, including FINRA, which reports the data for securities traded over-the-counter. **The daily short sale transaction data includes all trades reported to the consolidated tape as a short sale during regular trading hours, i.e., 9:30 a.m. to 4 p.m. and reflects the total number of shares sold short that day.**

Customization

EDI is proud to offer the most effective and efficient solutions tailored to meet each individual customer's needs. We offer a range of customization options including:

- Delivery-based solutions to complement existing client infrastructure.
- Content provided at the geographical or portfolio holding level.
- Feeds containing particular formats, field content and integrated client level data items.

EDI uses its extensive data research expertise to source, scrub and integrate new client specified data items with existing products and services. For instance, a request from a multinational investment bank to source the DR universe and map it against its underlying share portfolio ultimately led to the development of EDI's successful Depository Receipt Database.

In addition, EDI was the first vendor to successfully launch an ISO 15022 Corporate Action Messaging feed. This enables customers to reduce costs and increase efficiency by removing the need for multiple feed handlers.
