

Doing data differently

Helping the global financial community make informed decisions through the provision of comprehensive, accurate, timely and affordable securities and economic data services

With more than 30 years' experience, we offer comprehensive and accurate securities reference, corporate actions and pricing data for derivatives, equities, fixed income, and investment funds around the globe. We also cover economic data extensively.

We understand how crucial financial and economic data is and take a different approach as to how we proceed:

- We do not rent data, we sell it
- We do not have onerous redistribution rules
- We customize our services to meet your needs
- We cover all countries - no matter how large or small
- Finally, we offer competitive prices

As a result of our on-going commitment to providing cost-effective and innovative data solutions, while ensuring the highest standards, EDI has achieved the internationally recognized quality and security certifications ISO 9001 and ISO 27001.

Headquartered in the United Kingdom, we have operations in Australia, Canada, Germany, India, Morocco, South Africa, and the United States.

Our Support Team is available on +44 (0) 207 324 0020, 24 hours a day, Monday to Friday, and closed on Christmas and New Year's Day.

U.S Dividend Reclassification

Reduce operational risk and ensure you have all details you require for the US income tax season

The US Dividend Reclassification service can be utilized to create 1099s for your clients, as a secondary source to validate your primary provider or as a tool for your client support group to research customer inquiries.

The files contain a number of security reference data fields, facilitating EDI's content into your security master including issuer name, Issuer name, Country of register, Multiple security Identifiers, CFI and CIK codes, Industry classifications (SIC, NAICS), Security type, Security Description, and Ticker symbol.

The files also contain the specific income classifications needed for accurate and timely income tax reporting for each dividend payable on security. NRA Exempt Income Dividend – Amount per share, exempted from additional withholding taxes on dividend/interest income, applicable to foreign entities (Individuals, partnerships, corporations, estates, and trusts) from sources within the U.S., such as mutual funds.

Web Portal – Our web product offering contains the same content set with multiple searching and downloading tools. Basic Search with multiple identifiers or partial name, Custom Search using date ranges and specific dates (announcement, ex-date, record date, etc.), View and download results, customize your data fields, on demand downloads or set them up to run intra-day or end of day based on full universe or your portfolio.

At EDI we deliver critical information when you need it, directly from the source. Our files contain the specific income classifications, needed for accurate and timely income tax reporting, for each dividend payable on the security.

- Tax Year End Date – will be filled with the last business day of the tax year.

Corporate Actions

Combine our Reference Data with our Corporate Actions service, to benefit from comprehensive coverage of all open-ended funds. The product offers corporate actions events and also now splits out various income streams for funds, namely Dividend, Interest and Property, where applicable.

Utilize Our Comprehensive Corporate Actions

The risk to a financial firm of missing a corporate action can run into a loss of millions of pounds and can lead to reputational damage. Use EDI's corporate action service for funds and get coverage of the corporate action for the funds you hold.

Use EDI's Standardized Feeds to Develop an Enterprise Solution

Our funds data service will provide you with crucial dividend and corporate actions information. Corporate actions are often complex and deadline-driven and of importance to front, middle and back offices in a firm. Use our standardized feeds to ensure your firm is processing corporate actions and cascading them down the organization into downstream risk models and trading strategies.

The Funds Data Service helps Calculating Accurate Tax Liability

Investors and representative firms can calculate the correct tax liability payable by investors based on the breakout of various income streams in the EDI corporate actions feed.

Investment Fund Events

EDI is planning initially to provide the events listed below for funds, although this will evolve over time and after feedback from the industry. They are:

- Distributions (e.g. Dividend, Interest, Property)
- Consolidation
- Conversion
- International Code Change
- Issuer Name Change
- Liquidation / Return on Capital
- Fund Closure
- Change to Distribution Frequency
- Investment Policy and Objective
- Reference Data Changes
- Fund Closure
- Merger
- Security Name change
- Security Swap
- Subdivision
- Fund Launch
- Change in Fees

Investment Fund NAVs Service

The Investment Funds Net Asset Value Service (NAV) aims to deliver a bespoke database of NAVs to financial institutions. This service currently covers mainly Europe can be extended to investment fund providers in all the countries in the world on request. Our aim is to provide NAVs, whether daily/weekly/monthly/quarterly as soon as they are released by the respective Fund Houses.

Based on individual client requirements, EDI can set up feeds of NAVs of the selected universe of funds on a daily basis. Additional fields can be added based on client requirements depending on the public availability of the information.

Features of the Investment Fund NAVs Service

- Clients can flexibly choose the Investment Fund share classes NAVs they would like to receive.
- Apart from NAVs, additional fields can be made available subject to availability of public information.
- Flexible delivery – APIs, SFTP, Email, etc.
- Our operations team continuously monitors NAV releases 24/5 and updates clients at a mutually agreed time.

Delivery Method of the Investment Fund NAVs Service

We can deliver the files to individual clients via SFTP or API depending on the needs of the client. We are open to other forms of delivery depending on the client requirements.

The table below has a list of API fields available.

UK FundsCAB Service

For many firms, corporate action processing is complicated, deadline-driven, not standardised, and to a large extent still manual. Not processing corporate actions effectively can damage the firm both financially and reputationally. The actual financial losses due to processing failures are somewhat lower than expected though, as firms in the industry spend very large sums on failure prevention.

Additionally, corporate actions are no longer just a 'back-office' issue but also has moved into the middle and front offices in financial firms.

Processing failures can arise anywhere in the corporate action chain, and all market participants run the risk of failures. Why is this the case:

- errors in the downstream flow of information
- there is no standard way in which events are announced by issuers
- there is no single securities identification system that is universally accepted
- different information sources are often inconsistent
- processing details and terminology are often specific to a particular market or financial instrument

The result is that accurate information on corporate actions is often difficult to obtain. Moreover, since each party in the chain is responsible for getting the information right, considerable resources are spent on various external data sources and internal data scrubbing efforts.

EDI's UK FundsCAB streamlines corporate actions processing by delivering information faster than standard feed schedules. Designed to support global trading cycles, the service provides near-instant updates, transmitting data immediately after analyst submission. Covering more than 13,700 share class funds, UK FundsCAB ensures continuous access to accurate, market-aligned data for timely decision-making.

Monitor & track corporate actions as they happen

With UK FundsCAB, you can search, retrieve, manage and track corporate actions events and income distributions as they happen.

Use EDI's intuitive search functionality to quickly check a single issue or alternatively query the entire database using specific criteria such as event type, fund, and time frame.

Subscribers to FundsCAB get the additional benefit of daily emails of new announcements, for funds in their portfolio and their selection of events.

Easily Search and Retrieve

UK FundsCAB covers GB Open ended funds such as Unit Trusts and OEICs and includes corporate action sevenths and income distribution announcements. Closed Ended funds and ETFs are included in the UK CAB product, and sources announcements direct from the exchange and other sources.

UK FundsCAB announcements are directly sourced from fund management companies, press releases, industry publications and other sources, making a total of up to 100 sources, daily.

UK FundsCAB is a cost-effective solution that helps customers search, retrieve, and manage corporate actions information.

A cost-effective web-based application

The UK FundsCAB product is a cost-effective cloud-based application. The application sits on the main EDI website and can be accessed with a username and password.

The web-based application offers:

- Key search facilities
- Key data calendar
- Event announcements
- Portfolio import facility
- Download capabilities.

All holdings on the effective date will be compulsorily redeemed. The funds will be closed to Buys and Sells on the 14th April 2023. Any model portfolios that contain the Fund will become invalid and need to be updated.

Customization

EDI is proud to offer the most effective and efficient solutions tailored to meet each individual customer's needs. We offer a range of customization options including:

- Delivery-based solutions to complement existing client infrastructure.
- Content delivered at the geographical or portfolio holding level.
- Feeds delivered in various formats, field content and integrated client level data items.

EDI uses its extensive data research expertise to source, scrub and integrate new client specified data items with existing products and services. For instance, a request from a multinational investment bank to source the DR universe and map it against its underlying share portfolio ultimately led to the development of EDI's successful Depositary Receipt Database.

In addition, EDI was the first vendor to successfully launch an ISO 15022 Corporate Action Messaging feed. This enables customers to reduce costs and increase efficiency by removing the need for multiple feed handlers.

Customer support is closed on Christmas and New Year's Day.

We aim to acknowledge all queries within an hour of receipt and answer queries within 24 hours where possible.

We will send a progress report if a query is not resolved within that timeframe. We resolve around 95% of customer queries within 24 hours.

All queries sent to our Support department are filtered and dispatched to the relevant department. An IT staff member is engaged in the communication process to resolve complicated technical issues.
